

Combined Degree Exhibition 2020

This juried exhibition highlights the work of 19 students of the five-year Combined Degree program between Tufts and the School of the Museum of Fine Arts in Boston. As arguably the busiest place on campus, Tisch serves as a location for creative intervention. The show's integration into the library mimics the student body of the program, who dedicate themselves to both academia and fine art. Some works seamlessly interact with the space, while others confront and challenge their setting. The diverse range of works and its contrasting location provide a just portrait of the Combined Degree program. We are honored to present our work once again to the Medford Campus faculty and student body.
